

New Site Onboarding Playbook

A step-by-step guide for creche owners setting up LittleLoop for the first time.

Prepared for	New site owners — pilot & onboarding cohort
Covers	Sign in → Cockpit → School setup → Children → Classes → Invites → Billing
Version	v1 — July 2026

What to expect

This playbook walks through everything you need to get your creche live on LittleLoop, from your first sign-in to sending your first invoice. Each step below mirrors exactly what you'll see on screen — the screenshots are taken directly from the live product, not mockups.

Plan for about 20–30 minutes to complete initial setup. You can stop and come back at any point — nothing here needs to be finished in one sitting.

BEFORE YOU START

You'll need the login email and temporary password from your welcome email (sent when your school account was created), plus a list of your teachers' and parents' email addresses or WhatsApp numbers for the invite step.

STEP 1

Sign in to your account

Go to your LittleLoop login page and sign in with the email and temporary password from your welcome email.

The LittleLoop sign-in screen.

- Use the email address your account was created with — this determines which school you land on after signing in.
- First time signing in? Use “Forgot password?” to set your own password before continuing.

SECURITY

Your password is never visible to LittleLoop staff. If you didn't request a password reset email and receive one, don't click it — contact support instead.

STEP 2

Meet your Owner Cockpit

After signing in, you land on your Owner Cockpit — a live snapshot of your school for today. This is your home screen going forward.

Owner Cockpit — overview tab, day one (empty roster, ready to configure).

- **Today's attendance** — how many children are checked in against your total roll.
- **Today's roster** — expand to see who's checked in and out, in real time.
- **Quick actions** — Add child, Invite teacher, Invite parent — the three things you'll use most while setting up.
- **Billing snapshot** — collected vs. outstanding for the current month, capacity, and staff count.

STEP 3

Confirm your school settings, then add your first child

Open the **Settings** tab. At the top, confirm your school name, domain, and plan are correct — these were set when your account was created and control your branded URL.

The screenshot shows a web browser window with the URL 'littleloop-creche-v1.vercel.app/owner'. The page is titled 'Owner cockpit' and 'Sunflower House'. It features a 'School settings' section with fields for 'School name' (Sunflower House), 'Domain slug' (sunflower.littleloop.app), and 'Plan'. Below this is an 'Add a child' section with a sub-header 'Create the child record first. A default branch and class will be created automatically if needed.' This section includes input fields for 'First name', 'Last name', 'yyyy/mm/dd' (with a calendar icon), 'Allergies', and 'Notes'. A checkbox for 'Photo consent granted' is checked. At the bottom, there is a navigation bar with icons for 'Overview', 'Billing', and 'Settings' (which is highlighted).

Settings tab — School settings and Add a child form.

- **School name** — shown to parents and staff throughout the app.
- **Domain slug** — your dedicated web address (e.g. yourschool.littleloop.app).
- Scroll down to **Add a child**: first name, last name, date of birth, any allergies, and notes. A default branch and class are created automatically the first time you add a child, so there's nothing to set up beforehand.
- Leave **Photo consent granted** checked only if you have consent on file for that child — it controls whether teachers can share photo updates with parents.

DATA YOU'LL NEED

Have your enrolment list handy — names, dates of birth, and any allergy or medical notes. You can add children one at a time or come back and add more later.

STEP 4

Create classes, then invite your teachers and parents

Still on the **Settings** tab, scroll to **Classes** to group children and assign teachers — useful once you have more than a handful of children enrolled.

The screenshot shows a mobile app interface with two main sections. The top section, titled 'Classes', has a '+ New class' button in the top right corner and a message: 'No classes yet. Create one to group children and assign teachers.' The bottom section, titled 'Invite teachers and parents', has a sub-header 'Invite teachers and parents' and a note: 'Parents can be linked to one or more children during invite.' Below this is a dropdown menu currently set to 'Teacher'. Underneath the dropdown are four text input fields: 'Full name', 'Email address', and 'Phone (WhatsApp) +27 xx xxx xxxx'. At the bottom of this section is a large blue button labeled 'Generate invite link'.

Settings tab — Classes and the combined teacher/parent invite form.

- Tap **New class** to create groups like “Toddlers” or “Grade R”.
- Below that, **Invite teachers and parents** uses one form for both roles — switch the dropdown between **Teacher** and **Parent** before filling in details.
- Parents can be linked to one or more children directly during the invite, so their portal is ready the moment they accept.
- Enter full name, email, and a WhatsApp number, then tap **Generate invite link**. Share that link directly or let LittleLoop send it for you.

RECOMMENDED ORDER

Add children and classes before inviting parents — that way you can link each parent to their child in the same step instead of doing it twice.

STEP 5

Set up billing

The **Billing** tab is where monthly invoices, payments, and outstanding balances live per child.

Billing tab — monthly invoices by child and parent.

- Tap **New invoice** to bill a family for the current month.
- Each invoice shows the child, the paying parent, amount, due date, and status (*outstanding* or *paid*).
- Previous months roll up automatically underneath — nothing to configure, just review as payments come in.

You're set up

That's the full first-time setup: sign in, confirm your school details, add children, organise classes, invite your team and parents, and get billing running. Everything here can be revisited any time from the Settings and Billing tabs — nothing is one-shot.

NEED HELP

If anything on screen doesn't match what's shown in this guide, or you hit an error message, contact your LittleLoop onboarding contact directly rather than working around it — it may point to something worth fixing on our end too.
